

To whom it may concern:

I choose to pay for a premium radio service, XM Satellite Radio in my vehicle. Who is the NAB to dictate what I listen to? If local broadcasters cannot measure up to the high standards set by XM, why should I be forced to listen to local channels for my local weather and traffic? I enjoy all of the benefits of XM radio each time I drive my vehicle and rarely listen to local channels. XM provides crystal clear reception, a wide variety of programming to choose from and is commercial free on their music channels. This is a service that I pay for! I should be able to hear what I want, when I want.

Please REJECT NAB's petition 04-160!

Thank you,
Deanna Brant
